Changes to the State Department's Office of Global Change Description

The description paragraph for the Office of Global Change of the State Department has been updated several times resulting in significant changes. The terms “adaptation” and “sustainable landscapes” have been added, while the term “greenhouse gas” has been removed. In addition, several links, including one to the Climate Action Report, were removed.

Description

There were several changes to the description of the Office of Global Change of the State Department over the course of the past month. First, between January 6 and January 24, 2017, several sidebar links related to climate change frameworks were removed, and then, between January 24 and 25, 2017, the main paragraph description of the office was deleted. Later, between January 25 and 26, 2017, a new description paragraph was added with significant content changes as compared to the previous version, and finally, between January 26 and February 2, 2017, an “Archives” link was added to the sidebar.

Note: changes described in screenshot 1.1 were referenced in articles in [Business Insider](#) and [the Intercept](#).

The most notable changes are summarized here:

1. Removal of links to the “Climate Action Report” (screenshot 1.1)
2. Significant wording and content changes to the office description (screenshot 1.5)
 - a. Removed mention of “greenhouse gas emissions” and this sentence, in particular: “The working partnerships the United States has created or strengthened with other major economies has reinforced the importance of results-driven action both internationally and domestically and are achieving measurable impacts now to help countries reduce their long-term greenhouse gas emissions.”
 - b. The terms “adaptation” and “sustainable landscapes” have been added.

The Office of Global Change represents the United States in negotiations under the United Nations Framework Convention on Climate Change (UNFCCC), and in many other international forums on climate change, including the International Civil Aviation Organization and the International Maritime Organization. The office also leads U.S. government participation in the Intergovernmental Panel on Climate Change, which assesses scientific and technical information related to climate change. The office is further responsible for coordinating a number of bilateral and regional partnerships on climate change, as well as U.S. foreign assistance related to clean energy, adaptation, and sustainable landscapes.

(1.5a) Significant wording and content changes to the office description (screenshot 1.5)

Previous description of office:

“The Office of Global Change (OES/EGC) works on a broad range of international climate change issues, under the guidance of the Special Envoy for Climate Change. The United States is taking a leading role by advancing an ever-expanding suite of measures at home and abroad. The President’s Climate Action Plan highlights unprecedented efforts by the United States to reduce carbon pollution, promote clean sources of energy that create jobs, protect communities from the impacts of climate change, and work with partners to lead international climate change efforts. The working partnerships the United States has created or strengthened with other major economies has reinforced the importance of results-driven action both internationally and domestically and are achieving measurable impacts now to help countries reduce their long-term greenhouse gas emissions.”

Current description of office:

“The Office of Global Change represents the United States in negotiations under the United Nations Framework Convention on Climate Change (UNFCCC), and in many other international forums on climate change, including the International Civil Aviation Organization and the International Maritime Organization. The office also leads the US government participation in the Intergovernmental Panel on Climate Change, which assesses scientific and technical information related to climate change. The office is further responsible for coordinating a number of bilateral and regional partnerships on climate change, as well as US foreign assistance related to clean energy, adaptation, and sustainable landscapes.”
