Removal of Substantial Portion of Content and Reduction in Access to Resources on the USDA's Climate Hubs Website

August 1, 2017

Writing and review of this report was conducted and overseen by the members of EDGI's Website Monitoring Committee: Maya Anjur-Dietrich, Andrew Bergman, Gretchen Gehrke, and Toly Rinberg

EDGI DISCLAIMER - The information and images within this report are for general information purposes only. The scope of this report is limited to version tracking information of publicly available websites. EDGI has no control over the nature, content, or sustained availability of the websites we monitor. While EDGI works to assure that the information in this report is correct, that information is subject to the limitations of version tracking software, and is provided "as is." EDGI makes no representations or warranties of any kind, express or implied, about the completeness or reliability of this information, **nor does EDGI intend to assess any agency or entity's intentions or rationale for the demonstrated changes to any web pages or other online content that appear in this report**. In no event will EDGI or any of its members be liable for the use or misuse of the information in this report. Please consult with an appropriately qualified expert if you require qualitative evaluation of or advice about the content of this report.

Removal of Substantial Portion of Content and Reduction in Access to Resources on the USDA's Climate Hubs Website

The USDA has removed substantial portions of its <u>"Climate Hubs" website</u>. Between the evenings of July 27 and July 28, 2017, content, including links, text, and entire web pages, was removed from the website. Many pages linked from the homepage and various regional Climate Hub pages currently lead to pages with an "Access denied" notice. Information and resources, including links to external resources and visualizations of data, do not appear to be accessible elsewhere. Various links to different parts of the website have also been removed from the top panel. Certain pages hosting PDF documents (like the <u>assessment of climate change vulnerability</u> for the Midwest Climate Hub) remain live, although access to those pages has been greatly reduced, and they do not appear to be accessible from the "Climate Hubs" website.

We have not yet conducted a comprehensive analysis to determine if the pages described in this report have been archived in a US Department of Agriculture (USDA) website archive or another government web archive, though we have not yet found such an archive. In addition, we do not yet know if the overhaul described in this report is a temporary reduction in access to the resources described or if they are currently being hosted elsewhere on the USDA's public website, in a location we have not yet found. We will continue to search for these resources and write an update to this report if they are found.

UPDATE: On August 2, following media inquiries made with the USDA based on this report, the "Climate Hubs" website appears to have been restored to the pre-July 27 version. We have not confirmed that the restored version is identical.

Description of Changes in Access

- 1. Removal of information, links, calendar events, web pages, and other content from the USDA's "Climate Hubs" website. Most pages linked from the homepage now direct to a page with an "Access denied" notice (Page 1).
 - a. Page removals include the "<u>Climate Science FAQ</u>" and "<u>Tools and Data</u>" pages (Page 2), containing substantial information and links to tools from governmental and non-governmental entities for working with data.
- 2. The regional Climate Hubs pages have removed substantial content, including their main banners, news sections, and descriptive text. Most links on the page lead to a page with an "Access denied" notice, rendering substantial numbers of PDFs and other resources inaccesible from the website.
 - a. Changes to the "Midwest Climate Hub" page have been detailed as a representative example (Page 3). Page removals include the Midwest Hub's "Focus on Croplands" page (Page 4) and the "Regional Data and Research" page, which contained PDFs with data visualizations that are also no longer accessible from the website.

Detailed Description of Change in Access

Note: Internet Archive records indicate that some of these pages (like <u>this one</u>) may have been taken offline earlier this spring, during which they appear as Page Not Found, 404 Error messages. Since May 2016, our website monitoring software has not found any such 404 Error messages.

Note: The ten "Hub" pages in the table above can still be accessed from the "Climate Hubs" page through the links from the "Climate Hub Regions" map (the links from the map redirect to the URLs in the table above). As noted in the table, and demonstrated through a detailed description of the "Midwest Climate Hub" page (Page 3 below) as a representative example, substantial content and links have been removed from these "Hub" pages.

2. Assessment of access to pages from links in the "Popular Topics" section. The PDF linked from the "Climate Hubs Update" below has also been removed.

3. Assessment of access to pages from links in the "Focus on Climate" section

4. Removed links to news pages from "News" section and removed linked events from "Events Calendar" section. The specific removed links are not detailed in this report.

Side-by-side View of "Climate Hubs" Page: 7/24/2017 - 7/28/2017

Internet Archive: Previous versions of page from <u>January 12, 2017</u> and <u>May 20, 2017</u> and current version from <u>August 1, 2017</u>.

Page 2: Tools and Data

- URL: <u>https://www.climatehubs.oce.usda.gov/content/tools-and-data</u>
- Changes occurred between July 27, 2017 8:29 PM ET and July 28, 2017 7:56 PM ET
- **Note:** The "Tools and Data" page is included in this report as a representative example of a page from the tables in Page 1 above that that contained information and resources, but which currently has an "Access denied" notice.

Screenshot 2.1

1. Removed the "Tools and Data" page. The URL that previously lead to this page now leads to a page stating "Access denied." The removed content on the page has not been detailed. The page appears to have been an aggregator of references to other websites, and included a "Climate Hubs Tool Shed" portal that enabled users to search information about tools from various governmental and non-governmental sources. The page does not appear to have hosted datasets.
